

Mission statement

The Canadian Dental Laser Institute was founded with goals of educating all oral health care professionals with the best-in-practice, evidence based techniques and knowledge of dental lasers of various wavelengths, for the betterment of patient care and overall health. We are represented by a team of professionals with extensive practical and academic knowledge in the use of lasers, with specialties in periodontics, endodontics, pediatric dentistry, cosmetic and general dentistry and other sub-disciplines. By providing seminars, certification courses and practical hands-on workshops, our mission at the CDLI is to provide dental professionals with the opportunity to learn about one of the largest technological advancements in the field of dentistry over the last 50 years.
